Cordless Vacuum Cleaner with AC Adapter

DVC860L (Wet & Dry) / DVC861L (only Dry / HEPA filter)

AC

Max air flow
3.6m³/ min

Max sealed suction
24kPa

(with Powerful 1,050W motor, hose 38-25)

DC

Max air flow
2.1m³/ min

Max sealed suction
9kPa

(with two batteries BL1850B, suction power mode: 5, hose 38-25)

Continuous run time
65min
(with BL1850B)

HEPA filter

DVC864L / DVC863L / DVC861L

Able to capture 99.97% of particles as small as 0.3-1µm

Dual battery fuel gauge

indicates the power remaining in each battery individually in 3 stages with 3 LEDs.

Variable suction power control by dial

Suction power is variably adjustable.

Large on-off switch

- allows for easy on/off switching.
- functions only when Main power switch is on to prevent accidental switch-on during transportation, etc.

Automatic self-cleaning filter (VC1310L, VC2510L, VC3210L)

obtained by Triple filter structure composed of : Powder filter + Damper + Prefilter

When the power is switched on, Prefilter collapses into itself to compress Damper, and fits closely over Damper and Powder filter.

When the power is switched off, Damper expands back to its original size and shakes off dust from Prefilter automatically with its expanding power.

Powder filter

Damper

Prefilter

Allows for:

Constantly high suction power

Easy filter cleaning simply by tapping dust off of Prefilter

Quiet cleaning because Damper and Prefilter make no noise

VC4210L EU Dust Class L **VC4210M** EU Dust Class M

High performance. 1.400 W motor and high airflow will pick up even heavy debris

- MAKPAC holder in serial. Easy to clip the box on top of the machine.
- A power outlet with Auto/On/Off function is on both models with a max. socket load of 2.400 Watt.
- When working with electric drilling, sanding or cutting tools the automatic start/stop function activates the machine when a connected power tool is used.
- LED warning for air flow sensor system.
- New suction unit and re-designed filter system keeps cleaning performance at a higher level - even after repeated container fillings in demanding fine dust applications.
- Long-life filter bag made of washable micro-fiber material with high filtration level. Can easily be emptied and re-used.
- PTFE(Upstream Main filter) Flat filter protects the turbine by holding back fine dust & debris
- Infini Clean system(Automatic filter cleaning system) all 15 seconds it clean the filter
- PET filter cartridge for high-grade filtration of motor cooling air.
- Offers extra protection of motor turbine and electronic parts.

Growing Concern About Dust Hazardous to Health

Recently more and more people are showing their stronger interest in hazardous dusts which may cause the sickness of the nose, the throat, the lungs and the skins. Some fine dusts may cause lung cancer once accumulated inside the body.

Dust classes in accordance with the EU standard

Since 1997, hazardous dusts have been categorized into 3 (three) classes, namely, Class L, Class M and Class H, which is regulated by IEC60335-2-69 (world wide) and by EN 60335-2-69. The vacuum cleaners suitable for each of dust class have been also defined by these regulations as follows :

Dust class	Model No.	Definition Of Dust	Major requirement	Dust permeability *4
H	VC3211H	*OEL values >0.1mg/m ³ all kinds of dusts caused cancer, disease.	<ul style="list-style-type: none"> • Air flow sensor • Filter protection structure *1 • Structure that requires a tool for filter removal/installation *2 • Structure that protects users from exposure to dust when emptying dust bag *3 	less than 0.005%
M	VC3211M, VC2211M, VC4210M, VC3012M,	*OEL values >0.1mg/m ³ as well as saw dust	<ul style="list-style-type: none"> • Air flow sensor • Filter protection structure *1 	less than 0.1%

HEPA filter

Apart from the above standard regulated by IEC/EN 60335-2-69, "HEPA" is widely recognized as one of famous guidelines of the filtration efficiency.

According to this standard, the filter of "HEPA " should remove more than 99.75% of airborne particles of 0.3µm in diameter. Thus, it stipulates only a filtration efficiency of the filter itself , while IEC/EN60335-2-69 defines the vacuum machine suitable for each dust class (construction, mechanical strength of machine) as well as its dust permeability.

In this sense, Dust Class H vacuum cleaner does not always have to be equipped with HEPA filter as long as it meets the requirements of IEC/EN60335-2-69.

Another difference between HEPA testing methods and the IEC/EN60335-2-69 is the dust loading.

Filter elements for dust classes M and H are to be tested with the limestone dust particles in large quantities for checking the physical strength of filter, while HEPA tests are done with very small liquid droplets.

* OEL : Occupation Exposure Limit
In dirty indoor environment with high activity , such as schools, the average values of OEL are measured 0.5mg/m³. In case of "non-activity place", 0.15mg/m³ in office and 0.2mg/m³ in school are measured in average.

*1 Filters should be protected from sharp objects such as nails when they are accidentally sucked up. The solution for VC3211M/ VC3211H is a protector for the filter units.

*2 Filters loaded with dust should not be easily removed. The solution for VC3211H is a screw that locks the filter unit lock lever to the lock plate.

*3 Dust should be prevented from flying around when emptying dust bags or replacing filters. The solution for VC3211H is the filter bag already available as an optional accessory of VC3211M.

*4 Permeability of limestone (marble) particles having a diameter of 5 microns or less, in accordance with the EU standard

Makita's Intelligent Robotic Cleaner

provides tomorrow's advanced cleaning today for office buildings, warehouses or stores.

Powered by two 18V Li-ion battery

With BL1850Bx2, able to clean surface area of

About two and a half tennis courts

*about 500m² with BL1850Bx2

Large side brushes + Large power brush

Side brushes enable to clean alongside walls, around obstacles or tight corners in either of pattern/ random.

ø50mm x 260mm Large power rotating brush

Dust box with 2.5L capacity

Dual compartment structure - one for small debris, the other for large debris - is ideal for commercial use.

Vacuum fan sucks up small debris into upper compartment.

Power brush picks up large debris into lower compartment.

spec DRC200

18 V LXT BL Brushless Robotic Cleaner

- Makita's Intelligent Robotic Cleaner For Commercial / Industrial Use
- Automatic Cleaning thanks to many sensors with selectable two running modes: Random Mode Cleaning / Pattern Mode Cleaning
- Cleaning Area Setting Function enables user to define a cleaning area.
- Able to clean an area of 300 m² per 120 min with a coverage rate of 80% (two BL1830B in parallel)

Safety Precautions

When using electric tools, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and personal injury, including the following.

/// KEEP WORK AREA CLEAN.

Cluttered areas and benches invite injuries.

/// CONSIDER WORK AREA ENVIRONMENT.

Don't use power tools in damp or wet locations. Keep work area well lit. Don't expose power tools to rain. Don't use power tool in presence of flammable liquids or gases.

/// KEEP CHILDREN AWAY.

All visitors should be kept away from work area. Don't let visitors touch the tool or extension cord.

/// STORE IDLE TOOLS.

When not in use, tools should be stored in a dry, high of locked up place, out of reach of children.

/// DON'T FORCE THE TOOL.

It will do the job better and safer at the rate for which it was intended.

/// USE THE RIGHT TOOL.

Don't force small tools or attachments to do the job of a heavy-duty tool. Don't use tools for purposes not intended.

/// DRESS PROPERLY.

Don't wear loose clothing or jewelry. They can be caught in moving parts. Rubber gloves and non-skid footwear are recommended when working outdoors. Wear protective hair covering to contain long hair.

/// USE SAFETY GLASSES.

Also use face or dust mask if the cutting operation is dusty.

/// DON'T ABUSE THE CORD.

Never carry the tool by the cord or yank it to disconnect it from the socket. Keep the cord away from heat, oil, and sharp edges.

/// SECURE WORK.

Use clamps or a vise to hold the work. It's safer than using your hand and it frees both hands to operate the tool.

/// DON'T OVERREACH.

Keep proper footing and balance at all times.

/// MAINTAIN TOOLS WITH CARE.

Keep cutting tools sharp and clean for better and safer performance. Follow instructions for lubrication and changing accessories. Inspect tool cord periodically and if damaged, have it repaired by an authorized service facility. Inspect extension cords periodically and replace, if damaged. Keep handles dry, clean and free from oil and grease.

/// DISCONNECT TOOLS.

When not in use, before servicing and when changing accessories such as blades, bits and cutters.

/// REMOVE ADJUSTING KEYS AND WRENCHES.

Form the habit of checking to see that keys and adjusting wrenches are removed from the tool before turning it on.

/// AVOID UNINTENTIONAL STARTING.

Don't carry a plugged-in tool with a finger on the switch. Ensure switch is OFF when plugging in.

/// USE OUTDOOR EXTENSION CORDS.

When tool is used outdoors, use only extension cords intended for outdoor use.

/// STAY ALERT.

Watch what you are doing. Use common sense. Don't operate tool when you are tired.

/// CHECK DAMAGED PARTS.

Before further use of the tool, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function. Check for alignment of moving parts, free running of moving parts, breakage of parts, mounting and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced by an authorized service center unless otherwise indicated in this instruction manual. Have defective switches replaced by an authorized service facility. Don't use the tool if the switch does not turn it on and off.

/// GUARD AGAINST ELECTRIC SHOCK.

Avoid body contact with earthed or grounded surfaces (e.g. pipes, radiators, ranges, refrigerators).

/// REPLACEMENT PARTS.

When servicing a tool, use only identical replacement parts.

/// VOLTAGE WARNING:

Before connecting the tool to a power source (receptacle, outlet, etc.) Be sure the voltage supplied is the same as that specified on the nameplate of the tool. A power source with voltage greater than that specified for the tool can result in SERIOUS INJURY to the user V as well as damage to the tool. If in doubt, DO NOT PLUG IN THE TOOL. Using a power source with voltage less than the nameplate rating is harmful to the motor.

Note

- Makita reserves the right to change specifications of parts and accessories without notice.
- Items of standard equipment and specifications may vary by country or area.
- Net weight and dimensions may differ by the type of battery.
- Standard export color for motor housing is Makita industrial green (blue).
- Please state required voltage when ordering. These offers are subject to availability in each country. Actual product color may differ slightly from color reproduced here.
- Weight data in this catalogue is the value measured by us according to EPTA Procedure.

Guarantee

Every Makita tool is thoroughly inspected and tested before leaving the factory. It is guaranteed against defective workmanship and materials. Should any trouble develop, return the COMPLETE tool prepaid to Makita or point of purchase. If inspection shows trouble is caused by defective workmanship of material, all repairs will be made without charge. The guarantee does not apply where repairs have been made or attempted by others; repairs are due to normal wear; the tool has been abused or in an accident; misuse is evident – caused by overloading the tool beyond its capacity, use of the tool after partial failure or use with improper accessories.
